

# Jorge Del Rio

Bachelor of Science in Electrical and Computer Engineering | Software Engineering

928-271-2926 | jorge.delriocuriel@gmail.com | linkedin.com/jorgedelrio22

## Core Technologies & Skills

Languages: C/C++ | Python | JavaScript | Java | Verilog | HTML/CSS | MatLab

Software: VS Code | PyCharm | CLion | X-Code | Vivado | GitHub | PSPICE | VESTA | EAGLE | Jama

Tools/Skills: Bilingual | PCB Design | Circuit Design/Development | Signal Processing | Software Application/Testing

## Academic Experience

Date

**Electrical Engineer** *2 Stage Audio Amplifier* ----- January 2024 - May 2024

- Implemented an audio amplifier utilizing NPN and PNP transistors to drive a 2W Speaker with a functional bandwidth from 20 Hz -1MHz. Achieved 0.5% total harmonic distortion for frequencies up to 10MHz.
- Improved SNR ratios by adopting noise reduction methods. Resulted in a smoother signal output as observed by oscilloscope.
- Utilized PSPICE to simulate the DC Bias Point and Transient Response of the system and developed a PCB using EAGLE.

**Electrical/Software Engineer**, *EDC 3D Printer Authentication System* ----- August 2023 - May 2024

- Utilizing RFID cards with Raspberry Pi 4 to scan and authenticate users for access to 3D printers
- Accessing a database via Google's API for student authentication and logging activity for security purposes.
- Responsible for securing, wiring, and powering Raspberry Pi and 3D printers and power management efficiency.

**Electrical/Computer Engineer**, *Automatic Plant Watering System Project* ----- August 2023 - December 2023

- Lead an Arduino-based plant watering system, using the ATMEGA 2560 and employing interrupts, state machines and timers for efficient button handling and system control.
- Integration of moisture sensing, water level monitoring, and pump control for capturing accurate data and using LCD to display real time data.
- Resulted in system being able to pour 0.5 cups of water, measured plant moisture 95% accurately and repeated intended procedure every 6 hours ( $\pm 10$  minutes).

**Software Engineer**, *Scholarship Report Generator* ----- August 2023 - December 2023

- Developed a Scholarship Report Generator in Java to automate generating and emailing reports.
- Responsible for the implementation of comprehensive unit tests for Annual, Application, Disbursement, Matching, and Scholarship Reports varying in memory (up to 2.1 MB) and data in order to capture the systems behavior.
- Resulted in system passing 10 unit tests, met 98 system requirements and able to generate and send reports within 6 seconds.

**Electrical/Computer Engineer**, *University Lab/Teaching Assistant* ----- August 2023 - December 2023

- Oversee a Verilog-based coding lab for a group of 20 undergraduate engineering students.
- Assist course professor in lecture with student inquiries and Exam proctoring
- Coordinate study sessions with students to practice and review course material

**Software Engineer**, *Sudoku Solver/Snake Game Project* ----- June 2023 - July 2023

- Taught 25 students the fundamentals of python programming to develop a Sudoku Solver and a Snake game.
- Utilized Backtracking algorithm to develop an A.I. to solve any given Sudoku.
- Developed an Q - Learning algorithm for the snake to learn how to play the game and score high.

**Electrical/Computer Engineer**, *Elephant Food Pellet Project* ----- September 2022 - December 2022

- Collaborated with multidisciplinary engineers to develop a food pellet launcher for elephant's enclosure to encourage exercise.
- Developed a Python script that uses a touchscreen to initialize the launching sequence of the food launcher.
- Created a launcher that shoots a scattered projectile up to 120 feet.

## Work Experience

Date

**OEBC Student Accounting Assistant**, *University of Arizona* ----- January 2023 - Current

- Purchasing Card (P-Card) reconciling; collect documentation/receipts from PCard holders and assign appropriate account codes. Prepare online orders for office supplies and textbooks from vendors.
- Prepare travel authorizations and assist with travel expense reimbursement requests using University of Arizona policy guidelines. Prepare employee expense reimbursements when a purchase was made using their personal funds.
- Other duties assigned are scanning, acting as courier to bursar for cash receipts, etc.
